Experiencing Ideas Spatially — We Take You into the Future

Are you an architect, interior designer, boat builder or furniture designer? Do you design the most exclusive buildings, yachts and furnishings?

As one of the few specialist providers worldwide, we can offer a new, fascinating, promotional and resource-saving technology for your business.

SO WHAT DO WE OFFER?

We offer the production of three-dimensional stereo content in virtual reality technology. Thanks to this high definition stereo VR content, clients and prospective customers can experience the house, boat or furniture in three dimensions, before they even exist physically.

Unlike other competitors, we offer true stereo content for VR applications (not to be confused with well-known “flat” 360° degree panoramas!)

The content we produce can be used on any popular smartphone and, using affordable VR goggles for Google Cardboard, provide an impressive and emotional experience.

WHY DO YOU NEED IT?

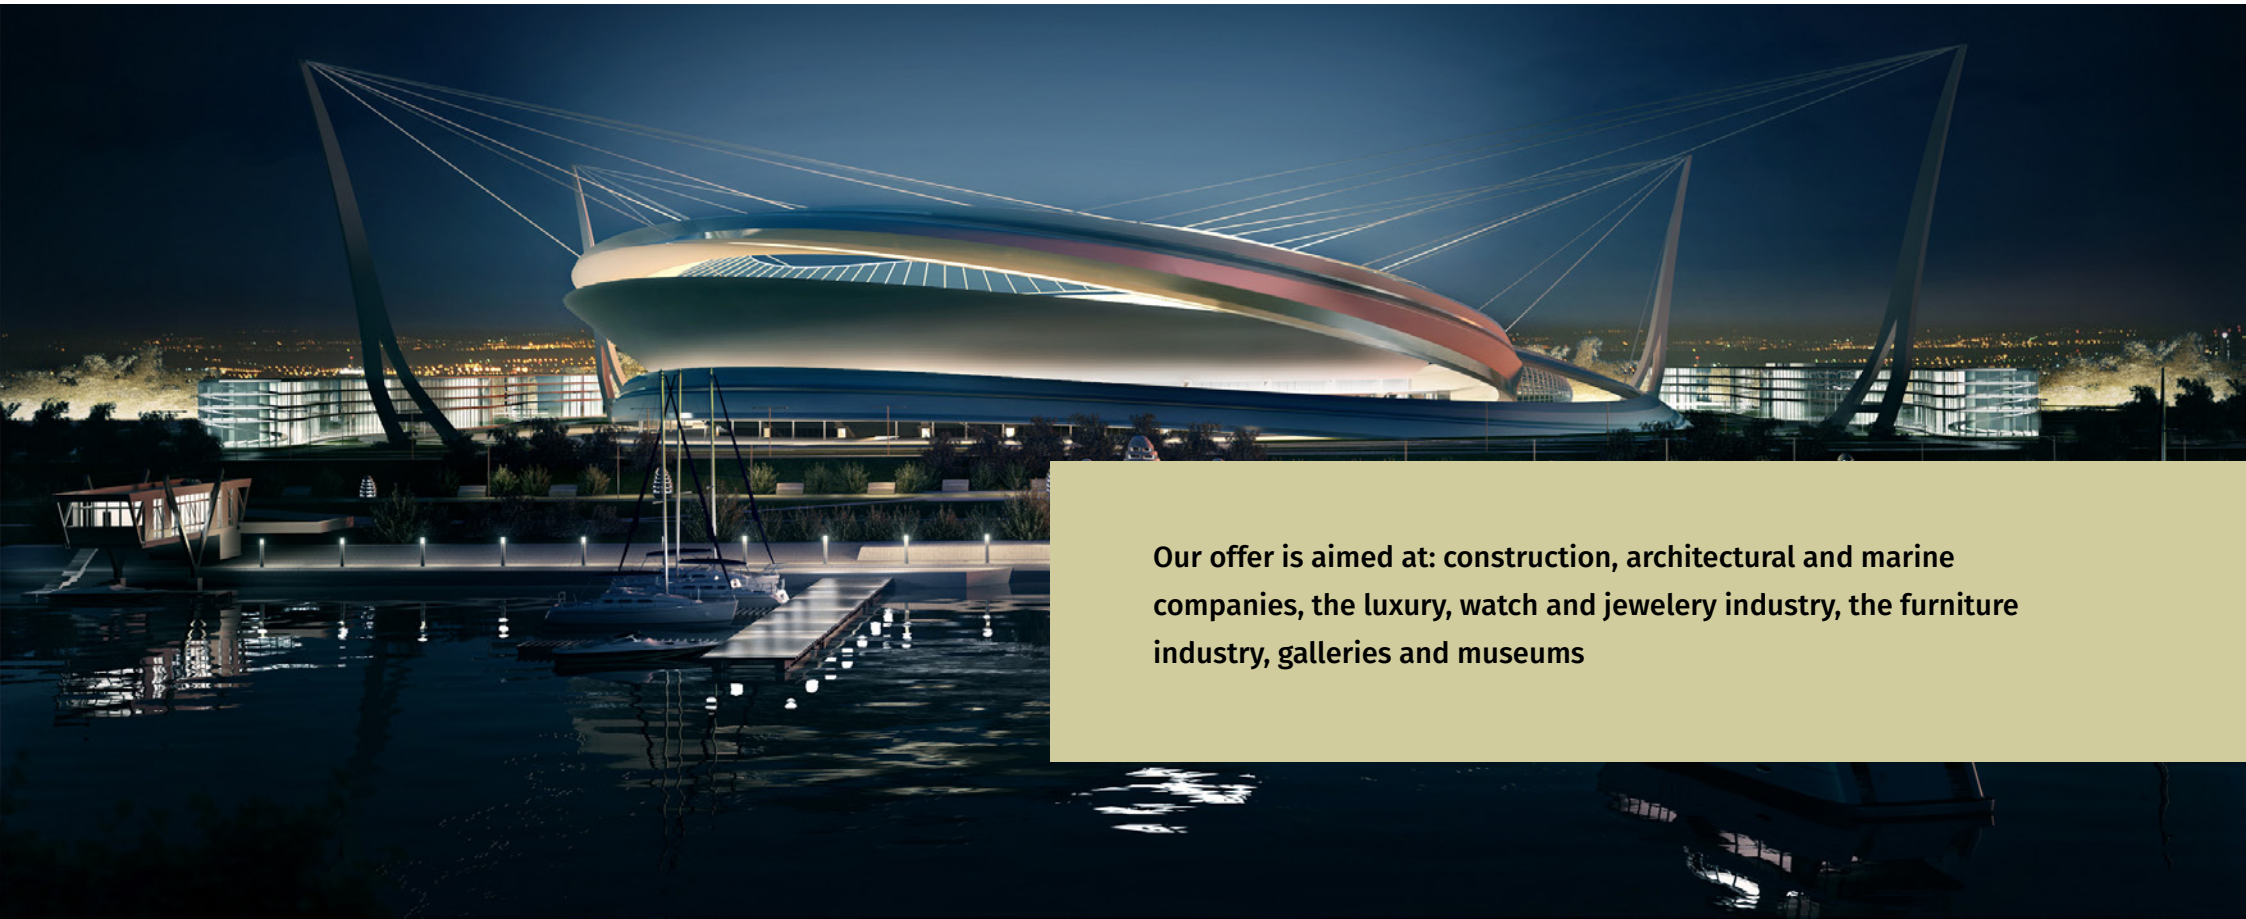

Going from the idea to the concept, the design and shell construction all the way to the finished object can take a long time. Strangers to the industry and laymen often lack understanding of your project without first being able to consider the dimensions of the finished object.

Spatial representation is the most effective way to impress your clients. This is now possible, even if the physical result of your work does not yet even exist. Let your prospective customers take a tour through the house yet to be

built, enjoy the view from the deck of the boat or admire your furniture in their own home.

This unique opportunity for product presentation also allows you to take the client's desired changes into account even during the planning phase.

Subsequent changes are avoided, the production process after approval is significantly shorter and cheaper.

Our offer is aimed at: construction, architectural and marine companies, the luxury, watch and jewellery industry, the furniture industry, galleries and museums

PRICE EUR
6'500.-

IMMO VR Package

THE PACKAGE FOR BUILDING FIRMS, ARCHITECTS AND REAL ESTATE AGENCIES WHICH MEETS EVERY NEED. BEST VALUE FOR MONEY

Our IMMO VR package for the real estate industry creates an individual app for iOS and Android for your properties. In doing so we put together your project exposé or you complete product portfolio as an individual business app. This is available for free worldwide through the Apple App Store and Google Play for prospects customers and clients.

The IMMO VR Package provides you with a number of benefits:

- Your project exposé is accessible to all prospective customers worldwide.
- Awareness of your company increases through its own high-end app.
- Your customers receive also a VR player at the same time to experience the VR stereo content we produce.

For perfect results, we recommend the client uses VR glasses. We can offer these at a reasonable price, also available with your logo upon request. The presentation of content is also possible without VR goggles, but not with the same perfect quality of perception.

Additional technology is not necessary to experience items yet to be built, showrooms or galleries LIVE.

PACKAGE CONTENTS IN DETAIL

- Project or company exposé as a separate individual app for Apple's AppStore and Google Play Store, for smartphones and for tablets with integrated VR player for Google Cardboard content.
- Visualisation of a house with integration into the environment and 3 views.
- Photo-realistic visualisation of 3 interiors, with 3 views. High resolution images with up to 8000 pixels upon request.
- 4 stereo VR panoramas with 1 viewing positions and navigation from position to position.

PRICE EUR
3'500.-

IMMO Ratio Package

THE ENTRY PACKAGE DESIGNED SPECIFICALLY FOR BUILDING FIRMS, ARCHITECTS AND PROPERTY AGENTS WITHOUT THE VR FUNCTION

- Photo-realistic visualisation of a house with integration into the environment and 3 views.
- Photo-realistic visualisation of 3 interiors, with 3 views.
- High resolution images with up to 8000 pixels upon request is included.

PRICE EUR
1'500.-

App Package

THE PACKAGE FOR THOSE WHO DO NOT YET HAVE THEIR OWN APP

Separate project or business app for iOS and Android, for smartphones and for tablets; self-administration using a desktop, without the production of the content itself, therefore existing visual material is required.

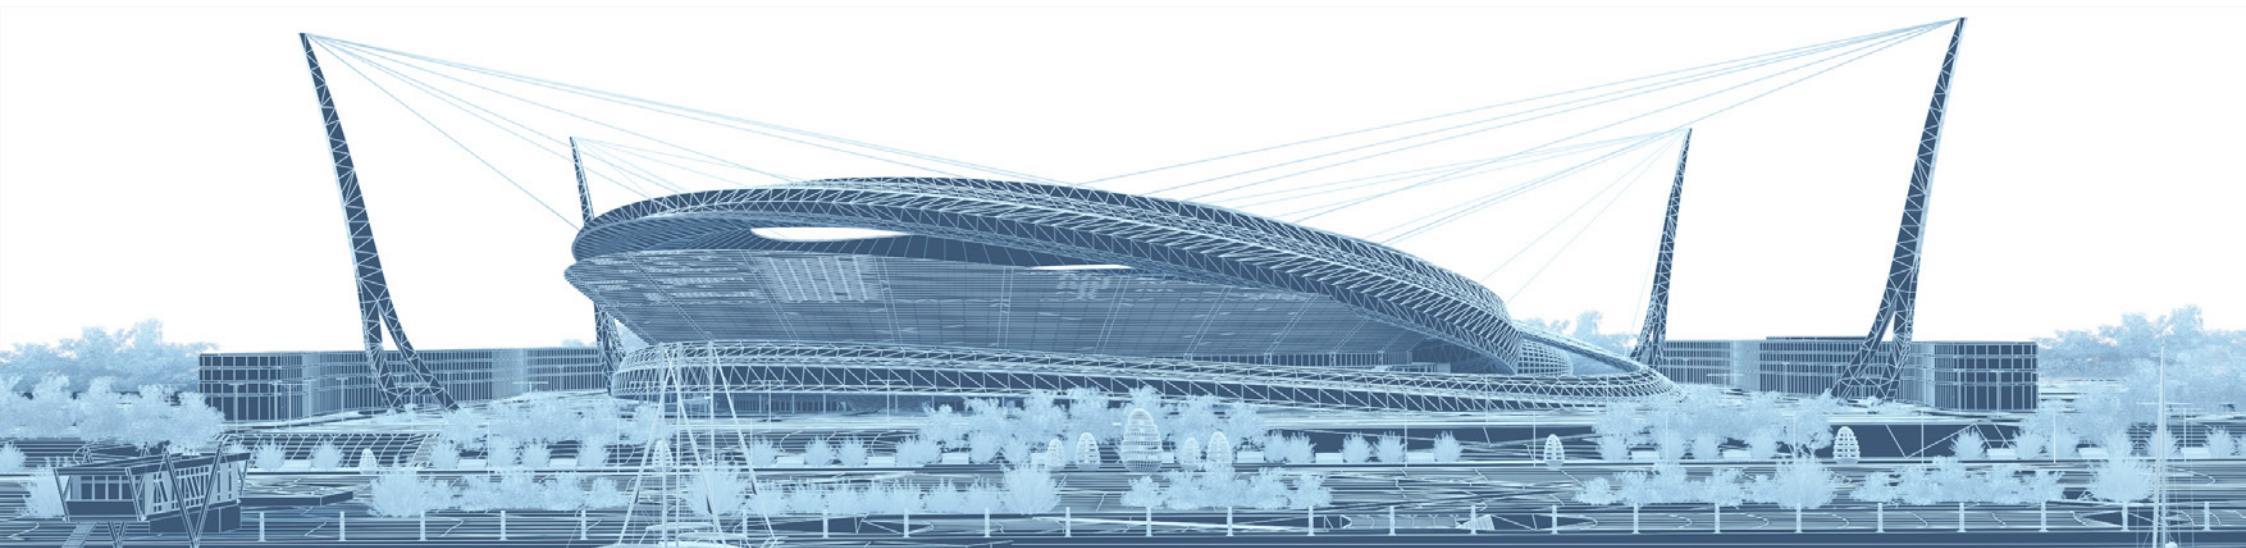

Other Examples of Services in the 3D and VR Field
